

## **“Global Burden of Animal Diseases”**

### **Theresa Bernardo, DVM, MSc, Informatics Theme Lead, Global Burden of Animal Diseases, IDEXX Chair in Emerging Technologies and Preventive Healthcare, University of Guelph**

Dr. Theresa Bernardo is a Canadian veterinary epidemiologist with experience in the United Nations and Inter-American systems in One Health informatics (humans/food/animals/plants). She is currently the IDEXX Chair in Emerging Technologies and Preventive Healthcare at the University of Guelph and co-lead of the Informatics Theme for the Global Burden of Animal Diseases (GBADs). Previously, Dr. Bernardo developed tri-lingual software for global reporting and mapping of animal diseases and zoonoses that was used in over 100 countries and adopted by the World Organisation for Animal Health (OIE).
